SUMMARY

Detail-oriented and analytical technical professional with demonstrated experience in precision-focused data annotation and a passion for advancing AI systems. Possesses strong written communication skills and a methodical approach to problem-solving, honed through 8+ years in complex cloud engineering environments. Proven ability to meticulously follow structured guidelines, analyze complex processes to identify success or failure, and produce high-quality, consistent results. Eager to apply these core competencies to contribute to a gold-standard dataset for training and evaluating Large Language Models.

CORE COMPETENCIES

- **Data Annotation & Labeling:** Manually labeling image and text data according to strict, multi-category classification systems for machine learning models.
- **Attention to Detail:** Meticulously following complex technical guidelines and security protocols where precision is critical for success.
- **Analytical Problem-Solving:** Systematically diagnosing issues, differentiating between partial and complete failures, and identifying root causes.
- **Clear Written Communication:** Authoring clear technical documentation, summarizing complex issues, and reporting on task outcomes.
- **Quality Assurance:** Reviewing and refining processes to ensure accuracy, clarity, and adherence to project standards.
- **Structured Guideline Adherence:** Proven success in rule-based environments requiring strict compliance with established protocols (e.g., security, deployment).

RELEVANT AI & DATA ANNOTATION EXPERIENCE

AI Data Annotation & Classification Project | SaveEarth Platform

- Compiled and structured a diverse dataset of animal images for an AI-powered platform focused on endangered species awareness.
- Manually annotated hundreds of images, meticulously labeling each one according to a strict 9-category classification system (e.g., Critically Endangered, Vulnerable, Near Threatened).
- Ensured data quality and consistency across the training set to enable the Azure Custom Vision model to accurately predict the extinction status of new images.

- This project, which involved foundational data labeling, secured two hackathon wins and received AWS funding.

PERSONAL AI & LLM APPLICATION DEVELOPMENT

- **DockerHelper:** Developed an AI tool that leverages LLMs to analyze code repositories and automatically generate optimized Docker configurations. This project involves parsing complex structures and applying rules to produce a precise output.
- **DocaPrise:** Created an AI-powered contract management system that uses AI to streamline the creation and editing of templated documents, demonstrating an understanding of applying AI to structured, rule-based tasks.

PROFESSIONAL EXPERIENCE

Cloud DevOps Engineer | INFOMETICS | Remote
September 2024 – Present

- Architected Executed complex system deployments by meticulously following structured technical guidelines and deployment runbooks, ensuring zero-error implementations in production-grade environments.
- Systematically analyzed and resolved critical system failures, identifying root causes by methodically differentiating between successful and failed process steps.
- Authored clear and concise documentation on system architecture and troubleshooting procedures, effectively communicating technical details to team members.
- Ensured system integrity by defining and applying granular security rules, demonstrating a strong capacity for precision-focused, rule-based work

.

Founder & Lead Cloud/DevOps Engineer | IGLUM TECH SERVICES (formerly Iglum Nig. Ltd.) | Ikorodu, Lagos
September 2019 – August 2024

- Translated client requirements into detailed technical project plans, ensuring all specifications were met with high accuracy.
- Implemented and managed CI/CD pipelines that required strict adherence to automated testing and quality assurance protocols before deployment.
- Reduced deployment errors by 50% through careful automation and process refinement, highlighting a commitment to quality and efficiency.

EDUCATION

Bachelor of Engineering (B.Eng.), Wood Products Engineering
University of Ibadan | Ibadan, Oyo State, Nigeria
2015 – 2019

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT (Selected)

- **Microsoft Certified: Azure AI Engineer Associate**
- **Project Management Professional (PMP®) – PMI**
- **Microsoft Certified: DevOps Engineer Expert**
- **Google Cloud Certified: Professional Cloud Security Engineer**
- **Multiple Hackathon Winner (including AI and Infrastructure tracks)**
